

ABSTRACT OF THE DISCLOSURE

In a substrate storage case in which a top lid and a bottom lid are connected through a hinge to be opened and closed, upper support parts and a lower support parts for a substrate projected from inner faces of the lids are provided in four corners of each of the top lid and the bottom lid. Two edges on the bottom face in each of four corners of the substrate are positioned, as well as supported by the lower support part of the bottom lid. Two edges on the upper face in each of four corners of the substrate are fixed with the upper support part of the top lid by closing the bottom lid with the top lid to store the substrate.
